

Wastewater Utility Green Power Report

May 2010

Electricity Generated : 67,240 kWh (kilowatt hours)

This amount of electricity would have cost \$4,706 if it had been purchased from Duke Energy.

Producing this electricity on-site prevented the emission of approximately 67 tons of carbon dioxide.

This amount of carbon emissions is about that of 11 average cars for a **year**.

The City of West Lafayette's Wastewater Utility has pledged to generate at least 6% of its electricity on-site as Indiana's first wastewater plant to become an EPA Green Power Partner.
